

# What Plastics Can Go Into Recycling Bins?

## PLASTIC BOTTLES

### That's It!

Rumpke only recycles plastic bottles and jugs where the opening is larger than the bottom because there is a market for these plastics.

Putting other plastics, like bags, yogurt and sour cream containers is introducing trash into the recycling stream, making more work at the sorting facility and adding expenses. Plastic grocery & garbage bags are a no no too—they aren't recyclable and they get caught up in the sorting machinery, causing jams and downtime.
